EXPERIENCE

Operations Executive – Last Mile Management | Flipkart Bengaluru, Karnataka
Apr 2025 – Present

- Managed last-mile operations and workforce planning during high-volume events like Big Billion Days (BBD), consistently delivering on AOP.
- Designed and executed Minimum Guarantee (MG) workforce model, driving delivery productivity benchmarks (35 shipments – metro | 30 shipments – non-metro) and improving throughput and operational efficiency.
- Owned attrition management and workforce retention strategy, leveraging KPI dashboards, cohort analysis, and trend tracking; implemented an AI-based bot calling solution to re-engage attired wish masters, reducing overall attrition to 6%.
- Led fraud risk management and loss prevention initiatives across Flipkart & Myntra Charters, covering seller fraud, externalization fraud, and delivery fraud detection.
- Performed data-driven fraud analytics to identify high-risk delivery associates, implemented blacklisting and control mechanisms, reducing fraud losses by ₹1 Cr during BBD.
- Conducted CRM implementation and UAT for recruiter workflows, ensuring 95%+ adherence and process compliance.
- Collaborated cross-functionally with Supply Chain, Hub Operations, and USO teams to address manpower gaps and improve hub-level performance metrics.
- Developed and maintained real-time dashboards using Looker Studio and generated reports using Advanced Excel (Pivot Tables, VLOOKUP) and Google Sheets, enabling data-driven decision-making.

Data Analyst | AI Variant Bengaluru, Karnataka
April 2024 – Feb 2025

- Developed Power BI Dashboards achieving 30% reduction in reporting time.
- Built Ecommerce Dashboards identifying top products leading to optimized delivery process and 30% increase in sales conversion, improving customer retention by 25%.
- Streamlined data workflows and reduced processing time by 15% through Power Query.

Embedded Software Developer | Meritech Software Bhubaneswar, Odisha
May 2023 – Feb 2024

- Contributed to optimizing performance and productivity in the company's core operations using UART & I2C Protocols.
- Programmed, debugged, and implemented efficient software solutions, enhancing semiconductor manufacturing processes.
